Getting the source section of a value

This is for sections that are inherited, and you want to know what section the inherited value comes from.

Example Config

```
[WeaponPointing]
Hits = 10000

[Weapons@WeaponPointing]
Plasma = true
Beam = true

[Enemy@Weapons]
Type = Boss
```

Code

```
    if (orxConfig_HasSection("Enemy")){
        if (orxConfig_PushSection("Enemy") != orxSTATUS_FAILURE){
            orxU32 hits = orxConfig_GetU32("Hits");
            const orxSTRING sectionHitIsIn =
orxConfig_GetValueSource("Hits");
        }
    }
```

Result

10000

WeaponPointing
