

Flashing an Object White

Useful for indicating hits on an object, for example in shoot-em-ups.

Assets

Code

```
orxObject_CreateFromConfig("Object");
```

Config

```
[Object]
Graphic          = Graphic
TrackList       = WhiteFlashTrack

[Graphic]
Texture         = ship.png

[WhiteShader]
ParamList       = texture
Code            = "
void main() {

    vec2 p = gl_TexCoord[0].xy;
    vec4 textureCol = texture2D(texture, p);

    gl_FragColor.r = 1.0;
    gl_FragColor.g = 1.0;
    gl_FragColor.b = 1.0;
    gl_FragColor.a = textureCol.a;

}"

[WhiteFlashTrack]
0.00 = Object.AddShader ^ WhiteShader
0.10 = Object.RemoveShader ^ WhiteShader
0.20 = Object.AddShader ^ WhiteShader
0.30 = Object.RemoveShader ^ WhiteShader
```

0.40 = Object.AddShader ^ WhiteShader
0.50 = Object.RemoveShader ^ WhiteShader
