

# Sine effect on an Object

## Assets

## Code

```
orxObject_CreateFromConfig("Chicken");
```

## Config

```
[Chicken]
Graphic      = @
Texture      = chicken.png
ShaderList   = SineShader

[SineShader]
ParamList    = texture # time
time         = time
UseCustomParam = true
Code         = "
void main() {
    #define BENDS 16.0
    #define SINE_HEIGHT 20.0 //less is higher

    vec2 p = gl_TexCoord[0].xy;

    vec2 sineAffectedP = vec2(p.x, p.y + (sin((p.x*BENDS - (time*2.0))) /
SINE_HEIGHT) );
    vec4 texFragment = texture2D(texture, sineAffectedP );

    gl_FragColor.rgba = vec4(texFragment.rgb, 1.0);
}"
```
