

## Part 16 - Jelly Monsters

We need something to create challenge in the game. Alien jelly monsters are the obvious choice. Lots of them. Here's a sprite sheet for the monsters:

Right click and save to the data/texture folder in our project as "monster.png".

Create a graphic from the sprite sheet in the config:

```
[MonsterGraphic]
Texture          = monster.png
TextureOrigin    = (0, 0, 0) ;required by the animation system for sizing.
TextureSize      = (32, 32, 0)
Pivot            = center
```

We need an object:

```
[MonsterObject]
Graphic          = MonsterGraphic
AnimationSet     = MonsterAnimationSet
Position         = (-310, -210, 0)
Scale            = 2.0
```

Then to define the animation set and the one animation we need:

```
[MonsterAnimationSet]
Texture          = monster.png
KeyDuration      = 0.1
FrameSize        = (32, 32, 0)
MonsterWobbleAnim = -1 ;use the entire sheet
StartAnim        = MonsterWobbleAnim
MonsterWobbleAnim-> = MonsterWobbleAnim
Pivot            = center
```

Just so you can see the monster working... add a MonsterObject to the Scene childlist:

```
[Scene]
ChildList = PlatformObject # MiddlePlatformObject #
TopLeftPlatformObject # TopPlatformObject #
TopRightPlatformObject #
StarObject # MonsterObject
```

Run the game and you'll see a monster wobbling in the top left hand corner of the screen:

en:guides:beginners:jelly\_monsters [https://www.orx-project.org/wiki/en/guides/beginners/jelly\\_monsters?rev=1530200364](https://www.orx-project.org/wiki/en/guides/beginners/jelly_monsters?rev=1530200364)

We need more than one monster, very soon we'll make lots of them drop out of the sky.

Last job is to give the monster a body and ensure he collides with platforms, bullets, and our hero:

```
[MonsterObject]
```

```
Graphic      = MonsterGraphic  
AnimationSet = MonsterAnimationSet  
Position     = (-310, -210, 0)  
Scale        = 2.0  
Body         = MonsterBody
```

```
[MonsterBody]
```

```
Dynamic = true  
PartList = MonsterBodyPart
```

```
[MonsterBodyPart]
```

```
Type        = box  
Solid        = true  
SelfFlags    = monster  
CheckMask    = hero # platforms # bullet
```

And add monster to the PlatformBody so that collisions work on both object types:

```
[PlatformBodyPart]  
Type      = box  
Solid     = true  
SelfFlags = platforms  
CheckMask = hero # monster
```

Run it again and the monster should drop down onto a platform.
