

# Orx Extensions

Extensions are added when creating a new project. You can get a list of available extensions with:  
`init help`

At the time of writing, the current available extensions are:

bundle	Automatic resource encryption & packaging
cheat	Secret pass/cheat code support
c++	Create a C++ project instead of C
imgui	<a href="#">Dear ImGui</a> support (adds c++ as well)
inspector	Object debug GUI inspector (adds imgui as well)
mod	Audio MOD, XM & S3M support
movie	Movie (MPEG-1) support
nuklear	<a href="#">Nuklear</a> support
remote	Web-served resources support, HTTP/1.1 only, proof of concept)
scroll	C++ convenience layer with config-object binding (adds c++ as well)
sndh	Audio SNDH (Atari ST) support

In the following video, larwain goes through the process of creating a project that provides the code to play Amiga and PC styled music mods.
